PROFILE

Final-year AI & Machine Learning engineer at KS Institute of Technology with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and NLP using Python, TensorFlow, PyTorch, and Scikit-learn, passionate about building scalable, real-world AI solutions.

EDUCATION

K.S Institute of Technology	2023 – 2027
Bachelor of Engineering (B.E.) – Artificial Intelligence & Machine Learning CGPA: 9.406	
Everwin Vidhyashram Senior Secondary School	2023
Class 12: 85%	
Class 10: 85%	2021

EXPERIENCE

ShadowFox	Apr 2024 – Jun 2026
Assistant Program Coordinator (Part Time)	
Coordinated mentor–intern meetings, clarified internship-related doubts, and scheduled and maintained communication between mentors and interns.	
Patel Engineering Works, Vizag	Feb 2026 – Jun 2026
Web Development Intern	
Developed and deployed a responsive static website for the company, enhancing its digital presence through modern, user-friendly web design.	

PROJECTS

NAV-SHIELD: AI-Powered GNSS-Denied Navigation System — <i>Android, Edge AI, Machine Learning</i>	
Developed an offline-first intelligent navigation system combining smartphone IMU/GNSS sensors, INS-based dead reckoning, AI-powered drift prediction, offline map matching, and adaptive sensor fusion to provide reliable navigation in GNSS-denied and degraded environments.	
Wearable Sensor-Integrated Armband System for Real-Time Cardiac Risk Prediction — <i>Machine Learning</i>	
Designed and implemented a wearable IoT-based cardiac monitoring system integrating ECG, SpO₂, heart rate, temperature, and respiratory signals with Random Forest–based ML models for real-time cardiac risk prediction.	
AI-Powered Medical Scribe with 3D Anatomical Visualization — <i>NLP, Voice Processing, AI</i>	
Developed an AI-driven system using speech recognition, medical NLP, and 3D visualization to automate clinical documentation and enhance patient understanding of medical conditions.	
Hospital Database Management System — <i>Python, Flask, SQL</i>	
Built a web-based hospital management system handling patient records, admissions, department and doctor management, user authentication, and a real-time statistics dashboard.	
AI-Powered House Price Prediction — <i>Python, Flask, XGBoost, Leaflet</i>	
Developed a full-stack price prediction app using an XGBoost regression model with neighborhood and amenity-based feature engineering, an interactive Leaflet map, and a Flask REST API for real-time predictions.	

ACHIEVEMENTS & LEADERSHIP

- Awarded the Special Jury Appreciation Award at HydroHackathon 2026 hosted by Indian Institute of Technology Madras for excellence in ship stability and hydrostatics analysis. 1st Prize Winner & Team Lead — Led a team in designing and deploying an AI-powered wearable cardiac risk prediction system with real-time alerts. - Recognized by the college with cash awards for securing 1st position in the department throughout the program. - Awarded a Certificate of Excellence for securing a Top 30 rank at the national-level Ideathon 2025. - Secured 2nd place at Synaptix 2026 Biotech Codeathon for developing an AI-powered medical scribe.	
---	--

TECHNICAL SKILLS

Programming Languages: Java, Python
Web Development: HTML, CSS, JavaScript, React.js, Streamlit, Flask
Database & Backend: SQL, MongoDB
AI/ML & Data: Machine Learning, Deep Learning, Computer Vision, NLP, Predictive Modeling, TensorFlow, PyTorch, Power BI
Tools & Platforms: Git, GitHub

CERTIFICATIONS & EXTRA-CURRICULAR

- Infosys Springboard – Unix Linux OS: Unix Commands in Details (Dec 2025) - Infosys Springboard – Database Management Systems (DBMS)
